Arithmetic and language should be curricted in a practical and interesting man-

History is dead and meaningless, unless it is made live by events transpiring every day all over the world.

Every school should have a school diary, question box and buildin board, all of which are incentives in some direction. The various school incentives were enlarged upon in an intelligent and instructive manner.

That spectacular buriesque, or winatever else it may be termed, the "Tweelve Temp tations," played to a very good house for a second performance, and cased up last night. The matince was only fair—it is almost coming to be a settled rule in Sait Lake that the matince is a thing of the past except as regards home attractions. It only needs to be said for the performance that the scenery and dubting were beautiful, and that the acting was absominable flow Mr. Glimore drived to resture into Frisco with wears like those in his leading berts, is one of the histoneces of manageral courage that deserves a unique place in the history of the drama.

Mr. Prestyman Kyrie Betiew, whose scantalous escupades have been filling the papers of late, came to Ch cago last week-the home of the avonas with whom his name has last been connected.
